Profil: Fachergaenzung (elective) from SoSe 2019	

Status	Elective
Leistungspunkte	3
Bewertung	Pass/Fail
Dauer	One semester
Angebotshäufigkeit	Summer semester
Arbeitsaufwand pro Leistungspunkt	30 hours
Arbeitsaufwand insgesamt	90 hours
Präsenzstudium	40 hours
Selbststudium	50 hours

Lehrsprache	English
Zugangsvoraussetzung laut Prüfungsordnung	
None.	

Modulveranstaltung(en)			
Veranstaltungsart	Lehrveranstaltungstitel	SWS	Pflicht/Wahl
Practical Exercise	The University of the Students	3	compulsory
Voraussetzungen für die Zulassung zu der/den Prüfung(en) (Vorleistungen)			
None			

Prüfung(en)				
Prüfungstitel	Prüfungsform	Bewertung	Pflicht/Wahl	Gewicht
The University of the Students	Learning reflection	pass/fail	compulsory	100%
Weitere Bemerkungen zu der/den Prüfung(en)				
<p>The course is taught by students under the mentorship of the module coordinator. The module coordinator is responsible for the examination of the learning reflection. The learning reflection may include both written and oral elements. Details on the requirements for the learning reflection will be provided at the beginning of the course.</p>				

Lehrinhalte
<p>The course aims to build a sustainable community through a reflection on how to build a social environment at the University of Kiel that supports individual and collective efforts towards sustainability.</p> <p>The seminar will address building sustainable communities in two different ways.</p> <p>Firstly, the participants of the seminar will work on the individual level of action within a community. The course will pay special attention to the issue of unsustainable lifestyles and consumption. By tackling their own routines and habits, the participants will work towards a more sustainable lifestyle through a sustainability tandem program.</p> <p>Secondly, the participants will address the question of how to build a sustainable community and take action by developing and implementing a community on campus. They will get to know several (sustainable) communities and use this knowledge to build a community adapted to the specific context and needs of CAU students.</p> <p>The sustainability tandem program will involve activities such as:</p> <ul style="list-style-type: none">● Taking concrete steps towards a more sustainable lifestyle.● Sharing a sustainable skill with a tandem partner or taking on a challenge related to sustainable lifestyle/consumption. <p>The in-class part of the seminar will involve activities such as:</p> <ul style="list-style-type: none">● Working as a group towards building a sustainable community at CAU.● Taking part in excursions around Kiel to observe and assess different existing approaches to sustainable communities, sustainable lifestyle and consumption.● Studying and discussing relevant theoretical approaches to sustainable communities and sustainable lifestyle: degrowth, consumption patterns and habits, 'bottom-up' processes, sufficiency, barriers to sustainable behaviour and the 'transition town' movement.● Learning through guest talks, from speakers with various experiences and fields of expertise.
Lernziele
<p>Participants gain theoretical knowledge and practical experience on how sustainable communities work and can be built.</p> <p>Participants experience that they can change routines and introduce new skills and habits towards a more sustainable lifestyle.</p> <p>Participants experience how to find solutions and concrete measures for how to build a sustainable community at CAU.</p>
Literatur
<p>Will be provided in the course.</p>
Weitere Angaben
<p>The course is limited to 20 participants.</p> <p>Please register on OLAT and come to the first meeting.</p>
